The meeting of the Senior Center Building Committee with John Howard and Bob Berwick – Meeting concluded with some recognition that incorporating energy efficiencies should be a priority. The Building Committee said they would pursue more information as they begin the design process for the new building.

There continues to be discussion with Town Hall about how to achieve the necessary energy savings to qualify as a Green Community. The Commission will recommend to Mike Sullivan that the UMass professor be asked to provide more details about how they do energy audits and what help from the Town is needed to conduct the audit. John Howard will follow up on this and report to us at our next meeting.
